World Cup Stadiums

Each stadium is represented by the games taking place there in the second stage of the competition. The centre of the circle is positioned over the stadium with the diameter proportional to each stadium's capacity. E.g. A stadium with a capacity of 45,000 (to the nearest 1,000) has a diameter of 45mm.

The solid circles represent the stadiums not holding any matches during the second stage of the competition.
